Fit Interview Bootcamp

Did you know that **50%** of your final score in a consulting interview is predicated on the behavioral (or fit) portion of the interview?

The case interview exists to see if you can do the job. The fit interview exists to determine who would be the best cultural fit out of the people who can do the job.

INTERVIEW TYPES

Management Consulted is an incredible resource for more than just Management/Strategy Consulting Case Interviews. Check out how to leverage this tool for other types of interview requests you may get.

Case Interviews for Analytics

For Analytics Case Interviews, you will often be presented with a real or hypothetical business challenge.

You may be required to:

- Generate insights
- Create visualizations
- Report out with a PowerPoint presentation

Evaluates:

- Analytical, problem-solving, and technical abilities
- Your decision-making process

How can MC help?

Case Math Video Drills

- Analytics roles often test your ability to quickly process numbers and perform calculations without tools.
- Practice to improve your speed and accuracy with numerical reasoning or data-intensive questions.

PowerPoint Course

- Use these presentation tips to refine how you explain technical findings and visualized data (e.g., charts, graphs).

Market Sizing Framework & Drills

- Practice cases that involve:
 - Making sense of ambiguous data sets.
 - Estimating market size using logical, step-by-step reasoning.
 - Creating business recommendations based on data trends.

Technical Interview

A technical interview is an assessment of technical skills within specific software such as Advanced MS Excel and Tableau. Python and SQL testing likely focuses on coding, programming, structured queries, relational databases, etc.

How can MC help?

Brainstorming Drills

- Improves your ability to develop creative ideas quickly, and remain structured as you go.

Exhibit Drills

- Get ready for a simulation of the types of visual data you'll see, such as Area graphs, Bar graphs, Waterfall Graphs, Charts, etc.

Excel Course

- Learn Excel basics and how to create models, while looking at sample data sets.

Mental Math Drills

- Practice mental math exercises to build speed and accuracy in estimating probabilities, percentages, and other metrics.
